

CHINA: 4th INLAND WATERWAYS PROJECT

The Government of China is modernizing and upgrading transportation infrastructure, with a particular emphasis on inland waterway transport.

Land & Sea Environmental Consultants Ltd. was retained to undertake the environmental review of proposed waterway works in the Province of Guangdong and Guangxi Zhuang Autonomous Region. The project entailed dredging of extensive sections of waterways within the Pearl River delta and North River and construction of two dams and associated shiplocks. The loan application was US\$150 million of a US\$350-million project.

Client: World Bank
