

CANADA: DREDGED MATERIAL MANAGEMENT, SAINT JOHN PORT AUTHORITY, NEW BRUNSWICK

Land & Sea Environmental Consultants Ltd. was retained to conduct a detailed review of all environmental studies of dredging and dredged material disposal for the Port of Saint John. The review covered studies from 1975 to 2000. Evaluation included development of a management plan for the Black Point open-water disposal site. Evaluation also included a detailed assessment of existing contaminant distributions at the disposal site. Study was conducted in cooperation with Atlantic Geoscience Centre of the Geological Survey of Canada.

Client: Environment Canada.
